

PUPIL ACTIVITY ACCOUNT

Schools of the District may establish a pupil activity account with lessor accounts in order to transact necessary receipts and expenditure of moneys to support programs within the school which are of an extracurricular nature, and which are wholly or partially supported by funds generated by the efforts of the student body.

The Superintendent of Schools shall establish a procedure, consistent with State statutes, for collecting depositing, spending and accounting to the Board of Education for all moneys in the pupil activity account. These funds shall be subject to annual audits with such audit reports being made available to the Board of Education and to others as directed by the Board of Education.
