

ADMINISTERING MEDICINE TO STUDENTS

No prescription medication is to be given to students by school personnel without a written order from a physician. An original pharmaceutical label may be used in lieu of a written order.

Over-the-counter medications may be given to students provided the parent has given written directions and the medication is in the original container.

The use of medications at school is discouraged. Since most medications are available in longer acting forms, parents and students are encouraged to administer such medication at home.
